Re-elected.

A. S. Gough, Reeve.

M.D. of Rosebud No. 280.

The council held their first meeting at Crossfield on Friday, 13th inst.

On the call of the returning officer, Mr. Ed Kirk, for nominations for Reeve, Councillor A. S. Gough was nominated by Councillor Geo. Ainscough and unanimously re-elected Reeve for another term.

Councillor Geo. Ainscough was re-elected Deputy Reeve.

Accounts and correspondence dealt with related to routine matters.

It was agreed to grant \$150.00 to Grace Hospital, Calgary.

The council decided to again offer a bounty of 1 cent to the school children for each gopher destroyed before 30th April next. Mr. R. D. Sutherland was re-appointed Secretary-Treasurer and Assessor, and Mr. E. M. Crisfield was re-appointed Weed Inspector and Bailiff.

Reduced Fares for Easter-Tide

Bargain fare excursions from the prairie provinces to the Pacific Coast, good from April 3 to 11, taking in the Easter weekend, were announced by J. B. Parker, secretary of the Canadian Passenger Association, on behalf of the Canadian Pacific and Canadian National Railways. Fares for this spring trip westward will be a cent a mile in coaches, a cent and a quarter in tourist cars and a cent and a half standard from Port Arthur to British Columbia points; with return limit of 21 days in addition to the date of sale.

Similar fares are offered from British Columbia to destinations in the prairie provinces east to Port Arthur.

Stopover privileges will be granted at Banff, Jasper, Nelson or west on westbound tickets sold from Alberta to Port Arthur and at Banff and Jasper only on eastbound tickets sold in British Columbia. Eastbound fares are good from April 4 to 11 inclusive.

Tickets will be good going and returning via the same line and route in each direction and will not admit of optional routes or side trips.

With Easter falling on Sunday, April 12, these excursions bring a welcome break after the long winter.

Oyez! Oyez! Oyez!

Commencing this week the Chronicle carries another local page. On page five we will feature several new columns, which we trust will meet with the approval of our many customers and readers.

How About That Fire Brigade

It is now some time since Crossfield experienced a disastrous fire, is this the reason why everyone seems lulled into a sense of security?

After the fire of November 1934 everyone was red-hot for a properly organized Volunteer Fire Brigade with efficient supervision. What has happened? Is the project likened unto the Arabs, folded up its tents and softly stolen away, into the deserts of oblivion?

The old maxim still stands "Fire is a good servant but a bad master."

How about it householders, ratepayers, and Village Fathers, must we await the outcome of another fire before something is done, or will we get this project under way now, so when the emergency arises we will be ready.

We, of the Chronicle, are willing to do what we can to assist in what ever humble way we can, so let's get together and get action, and not be like Nero of old, fiddle when the town is burning.

Military Orders

On Wednesday evening, March 25, at the local armories, 2 special "films" will be shown: "Cavalry in Action," "Amphibious Tanks." Adult guests are welcome. Commanding Officer, Colonel F. I. Scott, 15th Light Horse Calgary.

Births

On March 14, to Mr. and Mrs. Robert Whitfield, Jr., at the Lambe Hospital, a daughter.

On March 13th, to Mr. and Mrs. A. W. Smart, at Calgary, a daughter.

TAX NOTICE

All Outstanding Business Taxes for the first 6 months of 1936 are requested to be paid by the 31st of March. By Order of Village Council

Canadian Business Increase In Trade

The present level of general business activity in Canada is still about 10 per cent, higher than a year ago, although prolonged severe weather during February caused some recession from the level of January, when steel, lumber, newspaper and construction showed marked increases in output over the same month in 1935. Secondary industries were less subject to unfavorable factors.

January exports had a value of 20 per cent, higher than the year before and February exports of wheat showed improvement. It is expected that official trade returns for February, when available, will show larger shipments of lumber and newspaper, and that the demand for non-ferrous base metals will shortly increase.

Canadian farm purchasing power during 1935 is estimated at about 3 per cent, higher than in 1934, rising costs reducing the advantage that would otherwise have been gained by an increase of 5 per cent, in income.

Extract C. B. of C. Monthly News Letter.

Is the New Curling Rink Still a Live Issue

Sometime ago a project was got underway to establish in Crossfield a curling rink worthy of the Village and curling fraternity. Is this a dead issue or are the persons in charge still working quietly on the matter?

The Chronicle learns on good authority that there are several good-spirited citizens both urban and rural who are willing to help the scheme along, and we pass on this information to the committee in charge.

Those willing to assist are not necessarily Curlers, but getting them interested in the venture, might also be the means of adding them to the list of curling members.

Today's Thought

Set a watch over thy mouth, and keep the door of thy lips, for a tale-bearer is worse than a thief.—Bible.

Annual Meeting School Fair

The Annual Meeting of the School Fair Association was held at Crossfield on Saturday, March 14th. Eleven units will compete this year, instead of 12 as heretofore.

No change in the personnel of the Officers from 1935 occurred, and they read as follows:

F. Collicutt, Hon. President
Garner O'Neil, President
George Leask, Vice-President
Harry May, Secretary-Treasurer.

Last year over \$200 was paid in for prizes, and \$100 worth of merchandise for the same purpose. The Fair starts the 1936 season with approximately \$65 in the Bank.

The competing schools are:
Crossfield, 3 rooms
Sunshine
Inverlea
O'Neil
Greenwood
Glen Rock
Tany-Bryn
Elba
West Hope.

There is still time to enter if any other district desires to do so, and they will find it will pay them. No better thing exists for the Schools and Pupils like a School Fair.

The Officers in charge give of their time freely and Secretary May expends much effort on this project and they are worthy of much praise indeed.

The Calf Club is at present more or less in a state of suspense, until such time as a supervisor is appointed. Secretary May has been informed that this year some clubs may have to go without a supervisor, as there will not be sufficient of these competent men to go around.

Nevertheless it is not the intention of the officers to let the club die a natural death, and some scheme will be devised to carry on with or without a Supervisor.

Boys and Girls Calf Club

The Calf Club is at present more or less in a state of suspense, until such time as a supervisor is appointed. Secretary May has been informed that this year some clubs may have to go without a supervisor, as there will not be sufficient of these competent men to go around.

Mrs. Ben Huckell, Of Innisfail, Dies

Citizens of Innisfail were shocked Saturday morning to learn that Mrs. B. A. Huckell, wife of Ben A. Huckell, owner of the Innisfail Province, had passed away after only a week of illness.

Through her kindly disposition, Mrs. Huckell had won a place in the hearts of the people of the district and her death is deeply felt. She was a staunch member of St. Mark's parish, and at the time of her death was president of the Women's Musical Club. She was also an energetic member of Bertram Denison chapter I.O.D.E.

Besides her husband, she leaves two sons, Dr. Graham Huckell of the staff of the University hospital, Edmonton; John, of Innisfail, and a daughter: Mrs. John Taylor of Red Deer; also a sister in Peterboro, Ont.

The Chronicle joins with the rest of the newspaper fraternity in extending sincere sympathy at this time.

What About State Medicine?

State medicine as a solution of the "cost of health" problem is a subject very much in the air in the Western Canadian provinces just now and judging from cumulative public demands it is only a question of time and probably a very short time before state medicine or public health insurance in whole or in part, will be in effect generally in the west.

It is perhaps not surprising that the public mind is rapidly crystallizing in this direction. A number of factors are responsible for this. One of them is the much publicized depression of the past few years. During this period local governments have found it necessary to provide medical and hospital care for a large number of relief recipients and, of course, the cost has had to be passed on to the taxpayers.

In addition to that, very many of these taxpayers have during the past few years found it increasingly difficult to keep pace with growing tax bills and at the same time stand the expense of hospital and medical bills for themselves and other members of their families, for they have found that medical and hospitalization expenses have not declined in proportion to their own incomes.

Further than that all classes of the community are demanding a high standard of medical and hospital service. The hospitals that are best endeavoring to cater to this demand find that they cannot continue to operate at much less than pre-depression costs because of the difficulty of collecting accounts and the doctors declare that they cannot afford to reduce their fees to a scale commensurate with the pocketbooks of their clients because they, too, find the percentage of accounts they can collect from paying patients diminishing.

With this situation staring them in the face people generally are turning in the direction of state medicine as a way around the present predicament and the move is receiving support from at least some of the members of the medical profession.

The question, however, is a big one and bristles with many features which deserve full consideration before the plunge is made. While state medicine undoubtedly offers advantages there are some phases which should be dissected with care.

Not the least of these is the question of cost and how it is to be distributed. In other words who is to provide the means and from what sources. It would be the part of wisdom to ascertain with reasonable certainty that the advantages which the most enthusiastic advocates of state medicine claim for it can be realized in full degree before a complete scheme is made operative and whether the benefits are likely to be commensurate with the cost.

British Columbia and Alberta governments are both discussing health insurance schemes of more or less provincial scope and considerable pressure is being brought on the Saskatchewan government to adopt a scheme with prospects that before the legislature now in session adjourns, some consideration will be given to public demands.

The British Columbia plan makes provision for partial medical, hospital and dental services for certain specified classes of the community. Yet the total outlay is estimated at \$7,287,500 a year or \$12.50 per person. The amount to be contributed by the provincial government is limited, which may result in curtailment of the benefits and hospital service is limited to 21 days.

The Alberta Health Insurance Act, passed by the former legislature, but not yet brought into operation by proclamation, is based on the local option principle. In other words it can be brought into effect in any district in which the majority of the electors so decree by vote.

The Alberta measure provides for full medical, dental, hospital and nursing services without some of the limitations prescribed in the B.C. plan, but the total estimated expenditure is \$14,500 per person per annum, of which the district would contribute by local taxation \$11.25 and the province \$3.25.

Varying estimates have been made of the cost of a full scheme for Saskatchewan ranging from \$5,300,000 to \$6,796,000 for a service exclusively for farmers and members of their families, the latter figure being quoted by the rural municipal organizations, provided a similar plan to that proposed in Alberta were adopted.

Even on the basis of the latter total expenditure, the average annual cost per municipality, it was found, would be \$22,472, involving a municipal tax levy for that purpose alone, above or below ten mills depending upon assessment and population.

With these figures in mind and remembering the depleted state of provincial and municipal treasuries and the difficulty of collecting taxes under conditions which have existed in recent years it would appear reasonable to suppose that no complete scheme could be financially successful without some assistance from the Federal government or unless some other source of revenue than the land within the province adopting such measure can be found.

Taking all circumstances into consideration it might be wise, if the adventure is to be made, to try it out on an experimental basis, either by applying a complete scheme to a group of municipalities or district with the provincial government guaranteeing a deficit or by applying a partial service to an entire province. A test on some such basis would yield practical information as to when and how far further extensions could safely be made.

Increases Brain Pressure

Doctors Claim Noise Adds As Much As 400 Per Cent.

Noise increases the pressure on the brain, sometimes as much as 400 per cent., and causes loss of temper, irritability and undue excitation, a symposium on "The Effect of Noise in Health and Disease" at the New York Academy of Medicine revealed. Experiments at Bellevue hospital which measured brain pressure were described by Dr. Foster Kennedy, professor of neurology at Cornell University Medical College, who found that exploding an inflated paper bag increased the brain pressure to four times normal.

Dr. E. F. Fowler warned that some of New York City's very loud noises endangered the ear drum membranes.

To fight the Dutch elm disease that menace's America's elm trees, 3,000 men are at work on a program costing \$2,500,000.

There is no guess work in the milling of Purity Flour. Twice-daily baking tests by our laboratories ensure even, dependable and uniform quality. Enjoy the finest cakes, pastry, rolls or bread you ever tasted. "Purity" goes farther.

Would Scrap Auto Horns

Not Needed With Good Brakes Opinion Of Careful Driver

I have been closely connected with the building of automobiles and everything that goes with them for more than 30 years. I have driven over all the United States and Canada and never had an accident. Never had a traffic violation ticket of any kind. Modestly, I believe that I am competent and qualified to ask questions.

Why not scrap the horn and remove it from all cars except police, fire trucks and ambulances? The horn has proved to be a menace and everyone would be better off without it.

The brake takes the place of the horn on my car at all times. For any argument in favor of the horn, my answer is: Press on the brake first.—Letter in Detroit Free Press.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this is not flowing freely, your food doesn't digest. Just take a few drops of Dr. Carter's Little Liver Pills. They will get your stomach, you get constipated. Harmful food goes into the bowels and just feel some, and the world looks pink.

Dr. Carter's Little Liver Pills always get the liver working. You need something that works on the liver. I take them every day. Old Carter says he'll give you \$100 if you don't make the bile flow freely. They do the work of the liver. Ask for Carter's Little Liver Pills by name. It's the only one that does the work.

Stamp Must Be Requested

If Properly Tagged Return Poultry

Grates Not Dutiable

With regard to the export of live poultry from Canada to the United States, there is no duty charged on properly marked return crates, but a duty of 30 cents per crate is charged on Canadian shippers on the return of their crates into Canada, unless, prior to shipping the poultry to the United States, the Canadian shipper has the crates properly tagged by a Canadian Customs official as being of Canadian manufacture. A Customs stamp is placed by the Customs officer on wooden crates, and a metal seal is attached to metal crates. In order to have this stamp placed on the coops, it must be requested by the Canadian shipper.

MAKE YOUR OPPORTUNITY

What with more employment about, more trade, and more money to spend, there is time to make the most of opportunities for doing business. There is a tide in the affairs of men, which, taken at the flood, leads on to fortune. Obviously this is a time to make the opportunity, not wait for it, and if some have the desire, and lack the urge to do so, then their stock of nerve force is disastrously low, and should immediately be raised to the necessary working power level with Phosferine.

As always, the race is to the strong, and the energizing vitality of Phosferine ensures that one easily holds one's own in competition and leaders. The origin of most failures, disabilities, and inferiorities, is deficiency of nerve force, which is the course of Phosferine soon replaces with the stamina to make your opportunity!

Old House May Be Sold

Late King George Visited It In Halifax 40 Years Ago

Ware House, at Cole Harbor, a few miles from Halifax, which the late King George visited as a Midshipman 40 years ago and which once rung with royal voices, will be advertised for sale and removal unless someone will undertake the expense of restoring the property, the Halifax county council has decided. Years ago the Ware family sold the house and went to the Canadian west. The property was purchased by the County of Halifax and used as a residence for the caretaker of the County's Poor Home, nearby. When the house was burned down, it was abandoned.

Had To Trade Property

Owners Arranged Matter When House Put On Wrong Lot

Milton Brenner, councilman of Pasadena, Calif., went to see a lot he had just purchased and rubbed his eyes. On the lot was a house and Brenner was certain that two days before there had been no house there.

Investigation revealed a house mover had delivered the home to the wrong address.

It should have been placed on a lot next door, so Mr. Brenner and the home owner just traded their property.

More than 42 per cent. of the sales of farm products are made during September, October, and November.

Empire's Best Salesman

King's Visit To Industries Fair Is Helping Business

Edward VIII, as King promises to be an even greater salesman for the products of the British Empire than he was as Prince of Wales. This was strikingly borne out by the first comprehensive reports of the result of his visit to the British Industries Fair.

A New York tobaccoist bought all the samples of apple-shaped briar pipes the King admired at the Malta stand without even asking what the pipes would cost. He is planning to make a special window display of them in New York.

Malta has sold all its briar pipes. In fact, largely as a result of the King's visit. A thousand gross has been ordered and the Mediterranean will be working for more than a year on them. Arrangements have already been made for extension of the Maltese pipe works, increasing employment by 25 per cent.

Also, substantial orders were placed for Malta's homespun following a remark by the King that he had received some napkins made of the homespun from Lady Louis Mountbatten.

Ostrich feathers and sealskin slippers, a pair of which the King accepted from the Newfoundland stand, both benefited from the royal visit.

The King had said he would like to see ostrich feathers come back, but wondered whether he could influence women's fashions.

"The King's interest in ostrich feathers had a tremendous repercussion," said W. E. Henriette, of the South African trade commissioner's office. "It has brought in inquiries, mostly from milliners for decorative purposes, to an extent that we had never looked for."

"The industry has been moribund for years and years and the King definitely revived it." The good impression the King created while he was visiting in Hungary last year has also favorably affected British business. Two Hungarians at the fair declared they had spent \$6,000 on orders directly because the King had bought things at Budapest.

SELECTED RECIPES

ROLLED NUT WAFERS

1/2 cup "Crown Brand" Corn Syrup

1/2 cup butter

1 cup bread flour

1/2 cup sugar

1 cup chopped walnuts, or peanuts

Heat the "Crown Brand" Corn Syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

The Explanation

A Scottish minister had three bottles of champagne as a birthday gift, and handed them to his housekeeper for safe keeping. A short time afterwards he was entertaining friends, and asked the housekeeper to bring up a bottle of champagne. "Champagne, sir?" she queried. "Yes," he replied. "Don't you remember the three bottles I gave you weeks ago?" "Was you champagne? Mercy me, sir, I thought it was sma' beer, and had it w' my parritch, and I aye wondered how I w' aye see a cheery in the mornin'!"

Would Help A Lot

If the entire population could be induced to eat just one more slice of bread daily, the decline in bread consumption would be more than arrested. If Jesse Smith, president of the Millers' National Association, is correct in his estimate of results following such increase in Canada would mean an additional consumption of 742,541 barrels of flour, or 70,000,000 loaves of bread.

Give a man rope enough and he may be able to get his car going.

To Encourage Women Writers

Prizes Offered For Best Non-Fiction Article By Canadian

To encourage younger newspapermen and stimulate interest in more inspiring journalism from women writers, the executive of the Canadian Women's Press Club announced its memorial award of \$25 and a silver medal will be given this year for the finest piece of writing by a Canadian woman appearing in non-fiction.

Entries may be special articles or essays, dramatic, literary, musical or artistic criticism, editorials in magazines, newspapers or other periodicals, reportorial assignments or interviews.

This award is believed to be the first prize offered in Canada for fiction or non-fiction articles.

The contest is open to any woman writer actually resident in Canada within 12 months preceding publication of the entry; whether published in Canada or elsewhere; material will not be eligible which has been recognized by other awards.

All entries must be submitted not later than June 30, 1936, the award to be made not later than September 15, 1936; entries to go to the chairman of the Memorial Award board, Mable Crews, Ringland, Brookside, Islington, Ont.

The Memorial Award is named in honor of members of the Canadian Women's Press Club who have written their last assignment.

Plenty Of Clocks

Liner Queen Mary Will Have Nearly 600 Installed

When the Queen Mary comes into service next June she will have on board 596 clocks, the largest marine clock installation in the world. The whole system will be controlled from the chart-house. It will consist of 39 specially-designed clocks for public rooms, 31 specially-designed clocks for entrances from decks, 54 specially-designed clocks for special rooms, 370 clocks for first-class cabins, and 102 clocks for galleys, promenade decks, crews' and officers' quarters.

Frederick Leasure Ray, native of Quebec City who went to Canada's west in the day of its boom and became a prominent rancher, died at Halifax recently in the home for aged men at the age of 82.

He was a veteran of the Riel rebellion and his entire property was destroyed in one of its encounters. At the end of the rebellion he returned to Halifax, where his father had brought him in 1873, and remained there the rest of his life.

Ireland, New Zealand and Hawaii are the three snakeless isles of the world.

BAKING BRAN MUFFINS IS SO MUCH EASIER WITH QUAKER Natural BRAN . . . IT'S BETTER TOO—PERSONALLY I'VE NEVER HAD SUCH WONDERFUL RESULTS BEFORE, AND, OF COURSE, QUAKER'S MUCH LESS EXPENSIVE!

EASIER... BETTER...

More Economical

I'VE NEVER TASTED SUCH GOOD MUFFINS, YOU'RE A WONDERFUL COOK, MARG.

Especially intended for baking purposes, Quaker Natural Bran mixes well and gives better results from your favorite bran recipes. It's economical, too. That's another reason why hundreds of Canadian housewives bake with it regularly. There's a value coupon and a book of delightful bran recipes in every package. Order your supply from your grocer today! Look for the Quaker Natural Bran display at your grocer. He has all the things you need for the delicious recipes included in the recipe folder in each package.

QUAKER Natural BRAN

Diamonds Have Become Indispensable Article In All Industrial Processes

Diamonds, once regarded merely as glittering gems for the adornment of feminine beauty, and coveted for their value, are now playing a prominent part in industry.

To-day there are far more diamonds used for industrial purposes than as gems. But, as hardness alone is needed for industry and not color and water, their value is less than those used for adornment.

Industrial diamonds cost from \$2 to \$5 a carat. A flawless gem may realize \$100 a carat.

The grading, preparing, and sale of industrial diamonds is another industry which has become predominantly British.

London is now the centre of the trade, practically 98 per cent. of the world's production of industrial diamonds being dealt with within a few hundred yards of Hatton Garden.

Where once Amsterdam and Antwerp were the world centres of the diamond trade, London now reigns supreme. Amsterdam and Antwerp still do most of the diamond cutting and polishing, but the stones come from the London market.

Practically every industry now uses diamonds in one or more of its processes.

And it is diamonds, used for cutting the hardest of metals with extreme accuracy, and for sharpening and truing modern machinery and grinding tools, that have in great part enabled mass production with its greater rapidity and lower costs, to be brought into operation.

Industrial diamonds play their part in producing pipe-stems, electric light filaments, cutting and shaping stone, marble, and granite in a fraction of the time previously occupied, and in boring for coal and oil.

Scientists and engineers in recent years have increased the hardness of metals so much, particularly for steel, that it has been found extremely difficult to get metal tools to work them.

When it was found that diamond pointed tools would cut like cheese, diamonds became in great demand.

Rock drilling has been speeded up so tremendously by the diamond that the diamond-faced borers now used will cut through 18 inches of the hardest granite in an hour, even at a depth of 2,000 feet from the ground.

"From the turning of vulcanite pipe-stems to the making of motor cars, there is hardly an industry which does not use diamonds in some form or other," Mr. White, of the Diamond Development Company, said.

"All the big dealers in diamonds are now in London, and it is from here that they are sent all over the world. There is also a rapidly growing industry in this country in the manufacture of diamond-faced tools for all kinds of purposes.

"Such things as motor car pistons are now machined with diamond-edged tools, which give very great accuracy and a much smoother finish than can be obtained in any other way.

"Electric light filaments, which are made from very hard wire, are drawn through a diamond in which a hole has been bored. Extreme accuracy is necessary in this process, so that the very fine wire shall allways be of the same thickness.

"When metal dies were used the hole gradually got larger, altering the thickness of the wire and changing the voltage it would stand, but many tons of wire can be drawn through a diamond without the hole changing in size at all.

"From being purely a luxury article diamonds have during the last few years become an almost indispensable article in all kinds of industrial processes, and the demand for them is increasing every year as new uses for them are discovered. Fortunately the output has increased in step with the demand."

Was Right At That

An Englishman who was traveling in the United States, was asked how the highways in the United States compared with those in England, and he replied that there was a contractor by the name of Dixie and another by the name of Lincoln that built excellent highways in the United States; but there was a Frenchman by the name of Desour whose work was terrible.

If you promise to meet a person at 3:30, always be there at 4. Then you have only five minutes to wait.

China was the first land to adopt paper money, 807 A.D.

A Very Useful Organ

Many Allments Warded Off By Nose States Doctor

The following interesting article is by Jas. W. Barton, M.D.: It is said that the farther north one travels the larger will the noses of the inhabitants be found.

During cool or cold weather, which together make up a considerable part of the year in the northern climate it is out of the question to breathe unwarmed air. Our lungs would soon pain us to an unbearable extent. Strenuous exercise in cold weather brings a sharp pain stabbing the lungs as the air is drawn in, part through the mouth, to meet the great demand of the lungs for air. Because of these conditions natives of colder climates are equipped with long noses as compared with short noses of natives of warmer climates where nature partially prepares the air for human use. Residents of a cool climate require plenty of radiator space within their noses."

I am quoting Fessenden Edwards in an article on The Nose in Hygiene.

However, air needs more than warming before it enters the lungs. Some of the dust of the air should be removed by the tiny hairs inside the nose, the air must be moistened, and what is even more important, various infectious ailments are prevented if the moist mucous lining of the nose is in a healthy condition.

There was a time when the most important consideration was the amount of air that entered the lungs through the nose. If the middle partition of the nose (the septum) was bent an attempt was made by surgery to straighten it. And if the bony processes on either side of the nose were very large and obstructive, the removal of a part of the septum was done by a surgical operation.

To-day it is felt that in a number of cases this enlarged nose may have to be removed, but the operations are not as frequent now and every care is taken to preserve as much of the mucous lining of the nose as possible. This mucous lining is so powerful in warding off the ailments that come by way of the air—the children's diseases, tuberculosis and others—that after battling harmful organisms successfully it is ready to do so again within five or ten minutes.

The nose is a useful organ aside from the above as taste is felt to be at least three-quarters small. An infamed nose from a cold makes food almost tasteless.

Would Be Advantage

Light Colored Clothes For Children

"Don't buy your children black raincoats, if you have any regard for their safety," said Dr. B. Corbett, commissioner of public safety at Milwaukee and chairman of the U.S. National Safety Commission, in his address to the Board of Trade at St. Louis, Mo., Oct. 1.

Even for adults, said Dr. Corbett, black raincoats were bad enough but on children they were particularly dangerous, for raincoats were ordinarily worn at times when visibility is poor and motorists do not get a proper chance to see children who might be on the highway.

"Buy your children raincoats of light colors," was his advice and further suggested that light colored play clothes for children were also an advantage for the same reason.

Still The Railway Age

People Appreciate Service When Snow Blocks Highways

What we are wondering now is what we would do without the railways. With our paved highways buried under feet of accumulating snow that no plow could keep clean; with transport trucks, buses and cars stalled and buried in snow all along the highways, how would we have moved and lived and had our being if it had not been for the railways?

The truth is that we are not quite so fast and so smart as we thought we were. We haven't got past the railway age yet, and as far as this country is concerned, we probably never will.—Huron, Ont., Express.

The nearest star in the firmament is 25,000,000,000,000 miles from the earth.

Sweet potatoes form the second largest vegetable crop in the United States.

The SNAPSHOT GUILD

KNOW YOUR CAMERA

Remember that snapshots of your child doing something make the most fascinating pictures for your memory album.

Judging from the letters the Guild has received old Santa Claus must have pulled many cameras out of his bag and quite generously presented them to those of all ages.

Although modern day film has simplified snapshotting and allowed for a certain amount of variation in shutter speed and lens aperture, some owners of new cameras seem to be having a little trouble in getting properly exposed snapshots.

Well, the first time you played golf you didn't get a perfect drive, did you? It's practice and experimenting that make for improvement.

Here's a suggestion that will help you get better results; that is, if you follow it.

When you take a picture make a note of the "stop" you use. By that I mean, the first or second opening. If you have a box camera, or if you have a folding camera you should also make note of the speed of the shutter, that is, 1/25th of a second, 1/50th or whatever it may have been.

When the prints are returned you can look at them and say to yourself—"This one of Billie is awfully dark and doesn't show up as I expected. Let's see now!" Look this picture at noon at 1/50th of a second and had the diaphragm set at f.11. A little too fast to get the proper exposure under a hazy sky. The next time, under the same conditions, I'll either set the diaphragm pointer at f.8 to let in more light or else leave the diaphragm opening at f.11 and set the shutter speed at 1/25th of a second so as to give the picture a longer exposure." You can readily see how valuable and important this information would be to help improve the quality of your pictures.

A Versatile Couple

Canada's new Governor-General and his wife may be safely classed as the most versatile couple to ever occupy Rideau Hall. His place in literature is prominently assured for all time and in Kingston, Ontario, a play from her pen, "The Vision at the Inn," was presented in connection with a drama festival.

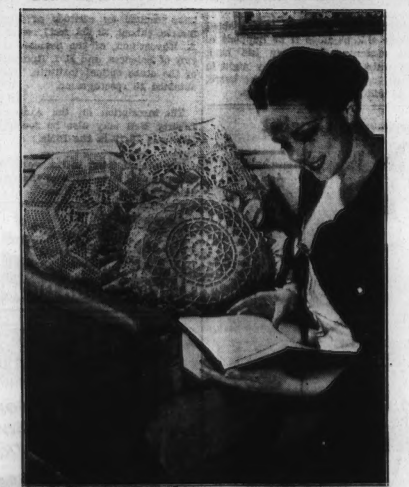

Honor is a harder master than the law.

Trapped By Peanuts

Peanuts are used by Patrolman Geo. Maestrestat, San Jose, Cal., to trap auto-parking violators. He places a peanut under the rear wheels of automobiles on his beat. An hour later he returns. If the peanut is crushed, he knows the auto has been moved. If not, the owner gets a tag for over-parking.

It is not necessary to be a Boy Scout to do a good turn a day.

DON'T BE ENVOIOUS—YOU CAN CROCHET THESE TOO!

Do you wish it were you—with these three lovely hand-crocheted pillows to your credit? Well, with no more than a simple Alice Brookes pattern will show you how to make them easily—and how to use the same stunning designs for dressy dollies, scarfs, spreads, is your crocheted book handy? Then all you need is the number of the pattern. The one in the corner that shows the popular popcorn stitch to form an eight-point star is Y5292. The lovely flower-centered square—done in varied colors—that forms the second pillow is Y5299. The open work design in the third pillow—that looks so handsome over a colored lining—is Y5213. All patterns give complete, detailed directions; illustrate the pillows and dollies, and stitch used; and give material requirements. Send 20 for each pattern (60c for all three) to Household Arts Dept., Winthrop Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Early Canadian Currency Tells Story Of Pioneer Business And Finance

British Farmers Get Break

Tithes Levied Against Land For Centuries Now Abolished

To end the controversy which has vexed Britain for more than a century, the government announced legislation to abolish tithes paid by landowners to churches.

British farmers have revolted several times in the last few years against the payment of tithes, particularly in Norfolk, Suffolk and Kent counties, where farmers have been hard pressed since the depression.

Tithes have been levied against land in Britain since the seventh century and since 1704 they have been collected for the benefit of the Church of England, under an act of Queen Anne known as "Queen Anne's Bounty." The revenue, which originally amounted to about \$100,000 a year, were intended for the benefit of poor curates. In recent years they have risen to a total of about \$11,000,000 annually.

During 1934, when several serious protests occurred, British farmers followed the passive resistance tactics of Mahatma Gandhi by lying in the paths of trucks which officials sent to their farms to confiscate cattle and grain in payment of overdue tithes.

In a protest last spring a sign was chalked on the side of a church, "Churchmen, be sporty and pay for your own religion."

Plans for changing the tithes system, which has been a knotty problem for several centuries, were introduced in Parliament two years ago, but the issue was sidetracked because it cut across party lines. Last December a proposal was introduced for abolishing tithes. They date from pre-Biblical days when land owners were assessed their whole "tithes" and thereafter one-tenth of each year's produce.

Prefers Commercial Life

Australian-Born Chinese Does Not Like Market Gardening

Melbourne, Australia, is contemplating a little study the vanishing of a familiar figure—the Chinese market gardener. In ten years the number who hold stands at the Victoria market has decreased by 25 per cent., and before very long, so the experts say, there may be no more. The Chinese gardeners, once a familiar sight on every little plot of ground in the odd corners of the suburbs are the survivors of the great Chinese migration in the gold rush days. Once there were as many as 35,000 Chinese in Victoria, but restrictive legislation, the return to the homeland and death have reduced their numbers to-day to a couple of thousand.

Of the present gardeners, many have no families and the young Australian-born Chinese is no more anxious than his white fellow citizen to slave in a market garden from dawn to dusk. He prefers commerce.

Women Homesteaders

Total Of 490 Claims Registered Last Year In Alberta

Homesteaders are flocking into the Edmonton and northern districts indicating a definite back to the land movement according to the annual report of the provincial land department tabled in the legislature by Hon. C. C. Ross, minister of lands and mines.

For the calendar year of 1935 homestead entries were 1,636 and of this number 1,012 were registered at the Edmonton office. Women farmers or "farmerettes" are also coming into the picture more largely than hitherto, according to the report. No less than 490 of the total homestead entries during the year were registered by women.

Over Million In Bonuses

The government paid \$1,033,869 in cheese bonuses during the latter half of 1935, according to information given in the House of Commons by Agriculture Minister Gardiner. Payments by provinces included: Saskatchewan, \$5,574; Alberta, \$11,232; British Columbia, \$4,996.

Schultz—"Your opening sale has closed. What now?" Schwartz—"Our closing sale opens."

Ice skating on a dance floor laid out like a multi-colored checker board is popular in Moscow, Russia, this winter.

Echoes of Canada's early days when a dollar was a "piastre" and "pieces of eight" were practical units of currency, reached Montreal a short time ago via the international banking route.

From a bank in the United States, The Royal Bank of Canada, received for redemption a bundle of old bills issued by the Union Bank, Montreal, Lower Canada, and dated 1838. This, some of them slightly dog-eared, the printing faded, they must have lain in some bottom drawer or closet for nearly 100 years. There were 83 individual bills in the bundle in denominations of \$1, \$2, \$3, \$5 and \$10. Their total value was apparently \$140.00.

The bills themselves tell a romantic story of Canadian pioneer business and finance. Engraved on the face of the "\$10" is a representation of a railroad train, presumably the first railway in Canada, which began operation between Laprairie and St. Johns, Que., in 1836, two years before the bills were issued. By a coincidence, The Royal Bank of Canada this year has issued a calendar depicting the opening of this same railroad.

It is interesting to note, too, that the bills are printed in a polygot of English, French and Spanish. The one dollar bill is engraved in French, English and a combination of French and Spanish, for the word "dollar" is translated on the opposite side into "une piastre." The use of the word "piastre" and its existence in financial parlance 100 years ago arose from the active trade which had grown up between Canada and the Caribbean.

Halifax and other Maritime merchants of 1838 were already familiar with this term through their dealings with many Spanish business men trading in the Maritime ports. Spanish currency and the piastre were common in Canada, particularly in the East and "piastres" were generally accepted as the equivalent of dollars. It is from this same term that our common expressions "two bits" and "four bits" originated; for the "piastre" was divided into eight equal parts, the "pieces of eight" of pirate fiction, each piece being a "bit." Thus "two bits" became a quarter or 25c, four bits, 50c, and so on.

Other details of the old bills bring to light other unusual facts concerning the trading and financial practices of the early days. At that time there was no legal currency in Canada. Groups of men organized themselves from time to time into local banks and issued bills to facilitate business dealings. Frequently the bills were issued payable to some stated individual, or "bearer." Thus, one of the \$5 bills of the 1838 issue reads: "Union Bank pay on demand \$5 to R. Harvey or bearer." Mr. Harvey's name being written in by the bank.

This story, unfortunately, has a sad ending, at least for the people who have presented these old bills for redemption. Little is known today of the Union Bank of Montreal, "The Union Bank of Lower Canada," however, did exist and later became the Union Bank of Canada, which was absorbed by The Royal Bank of Canada, and it is perhaps because of this circumstance and the confusion between the names of the two banks that these old bills have found their way to The Royal Bank of Montreal.

Saddest of all, the "Counterfeit Detector," used by bankers as a book of reference, states in cold, unemotional language: "Union Bank of Montreal: bank unknown and notes worthless."

But in this the "Counterfeit Detector" is wrong. The bills are not worthless. People interested in old coins and bills value them at 10c each. Thus, by the passage of time, \$140.00 becomes a mere \$8.30.

Transfer Was Success

The successful transfer of a living heart from one fish's body into another was described at George Washington University by Professor George Bain Jenkins. He told of keeping transplanted hearts living in embryos of sea minnows for from eight to 10 days. The hearts slow down a little at first, but after an hour they usually resume their normal speed," he said.

Those still on relief in the United States should start in numbers the total population of Canada.

Fur resources in the United States yield an annual income to trappers of \$65,000,000.

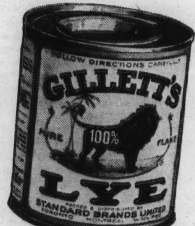

HOW CAN I FIX A STOPPED-UP DRAIN?

POUR DOWN GILLET'S LYE. IT WILL CLEAR RIGHT UP

QUICKLY FREES PIPES from clogging matter

Use Gillett's Pure Flake Lye regularly and you'll keep sink drains, tubs and toilets running freely. Each week pour it down full strength—it will not harm enamel or plumbing. Kills germs and destroys odors as it cleans. Gillett's Lye eases up dozens of heavy cleaning tasks—saves you tire some work. Keep a tin on hand.

***Never dissolve lye in hot water. The action of the lye itself heats the water.**

FREE BOOKLET—The Gillett's Lye Booklet shows you practical ways to lighten many household chores with this powerful cleanser and disinfectant... tells also how to use Gillett's Lye for thorough cleaning in and around farm buildings. Gives complete instructions for making household soap at home. Write for a free copy to Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

All Parties Represented

Committee Chosen To Study Elections Act And Amendments
Justice Minister Lapointe has announced the personnel of a special committee of the House of Commons to study the Dominion Elections Act of 1934 and amendments. All parties are represented on the committee which comprises 22 Liberals, five Conservatives, one C.C.F., one Social Credit and the one member of the Reconstruction party.

"It says the man was shot by his wife at close range."
"Then there must have been powder marks on the body."
"Yes; that's why she shot him."

Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, sores, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, grass-green and stainless—dries up almost instantly. Stops the most intense itching instantly. A small bottle, at drug stores, will prove it—money back. D. D. D. Prescription is made by the owners of **FRASER'S BROS.**

WORLD HAPPENINGS BRIEFLY TOLD

Daylight saving will be in effect in Toronto and Montreal from April 26 until Sept. 27, city councils decided.

The Franco-Canadian treaty of navigation signed at Ottawa, December, 1933, has been ratified by the senate.

European wheat production will fall below last year, it was forecast by the Institute of International Agriculture in a report showing a general drop in winter crops.

The Australian government has decided to erect a group of bronze statues in front of the parliament buildings at Canberra as a memorial to King George V.

Traffic returned to normal in London after a one day strike of 1,000 taxi, bus and street car drivers as a protest against orders shortening their lunch hours.

The Donnelly resolution to provide pensions for the blind passed in the House of Commons but Finance Minister Dunning held out no hope that pensions would be paid this year.

Total ordinary revenue of the Dominion government for the month of February was reported in the Canada Gazette at \$23,023,052 compared with \$23,292,900 in Feb., 1935, a decrease of \$269,850.

The 1936 British Mount Everest expedition, led by 51-year-old Hugh Rutledge, left Darjeeling, India, in an attempt to conquer the world's highest mountain with the blessing of Buddhist Lamas.

Fingerprints of all persons obtaining permits to carry revolvers will be taken and kept on file by provincial police, it was announced by Lieut.-Col. L. Lambert, chief of the Quebec division.

Imports Not Heavy

Canada Manufactures Ninety-Two Per Cent. Of Soap Used

The cost to Canada is more than \$9,000,000 a year to keep moderately clean and the women of the country pay two-thirds of that amount for ordinary household or laundry soap, soap flakes, chips and powdered soap, according to information received from the department of trade and commerce in Ottawa. The remainder of the amount is paid out for toilet and cattle soap of which nearly two and a half pounds are used annually for each man, woman and child in the country.

Ninety-two per cent. of the soap that hides ingeniously in bath water, that slips out of the soap dish, that is rubbed behind Johnny's ears and smarts in father's eye when he shaves, is made in the Dominion, while local manufacturers contribute an even greater percentage of the huge bars that melt in the dish, water or disappear in the washing machine.

The United States is Canada's best customer for soap while it at the same time supplies Canada with most of its soap imports. Exports to the United States last year totalled \$594,926 while imports amounted to \$344,980.

Classes in skiing are now being held at Nice, France.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation for the relief of headaches or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Snappy Clothes For Navy

British Admiralty Has Announced Some Radical Changes

Britain's navy is going all dinky. Not satisfied with attractive white shoes and new ties, in addition to the option of cocoa or chocolate instead of rum, Jolly Jack is now to be issued with a sports shirt of the most charming blue rayon.

And this is not all. Pajamas in attractive colors are to be offered in the canteens at \$2.50 a pair, made of the best artificial silk. For an extra quarter, the initials of the wearer can be obtained, also in silk, to be sewn on the pocket of the pajamas.

Gone also are the official canvas kit bags and henceforth Jack will be issued with a smart imitation leather suit case.

When ashore, Jack may, if he wishes, discard his bell bottom pants for a smart new rig of navy serge, with white collar and black tie.

These innovations have just been announced from the Admiralty in a document to commanders of the fleet who are asked to co-operate in every possible way in "helping seamen to adapt themselves to new and more attractive clothing."

What Jack will have to say about these silk pajamas if he happens to be suddenly called from his bunk for extra duty on a stormy night in the North Sea remains to be heard, but will hardly be publishable.

For Kiddies-Cotton-and-Crochet

Household Arts by Alice Brooks

The Thing for Warm Weather Dress-Up

PATTERN 5554

Lacy—airy—healthy, best describes this open mesh frock for little girls who like to play in the sunshine. You can easily crochet this simple style in colored string, for the body's entirely of a simple stitch, with contrasting yoke of the same stitch worked more closely. Isn't the finished result irresistible?

In pattern 5554 you will find directions for making the dress shown in sizes 4, 6 and 8 (all given in one pattern); illustrations of it and of all stitches used; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON MARCH 22

JESUS TEACHES TRUE VALUES

Golden text: Seek ye first his kingdom, and his righteousness; and all these things shall be added unto you. Matthew 6:33.

Lesson: Luke 12.
Devotional Reading: Psalm 23.

Explanations And Comments

Warnings Against Worry, Luke 12:22-34. Turning to his disciples, Jesus said, "Therefore I say unto you." He had just been telling the parable of "The Rich Fool," as we call it, which was about one who laid up treasures for himself, and was not rich toward God, verse 21. He followed this parable with his warning against covetousness, with his "Therefore I say unto you, be not anxious" for this and that. Matthew records in the Sermon on the Mount the words that follow.

Be not anxious for your life, what ye shall eat; nor yet for your body, what ye shall put on. For the life is more than food, and the body than the raiment. The argument is that since God has given us the life and the body, these greater things, we may trust him to give also the smaller things, the food to sustain life and the raiment with which to clothe the body.

"Here we have a principle capable of universal application. Live out your manhood; live out your womanhood. Do the things you were made to do. Seek your self-realization on the highest level. You will not give up mowing and reaping—you are not meant to be reavers. You will labor six days wisely and usefully, doing all your work. You will rest and aspire one day in seven. And when you thus live, intelligently and conscientiously bringing your lives personally and socially into harmony with the purpose of God for them, you may live without fear or worry. Do, seek your self-realization on the highest level. You will not give up mowing and reaping—you are not meant to be reavers. You will labor six days wisely and usefully, doing all your work. You will rest and aspire one day in seven. And when you thus live, intelligently and conscientiously bringing your lives personally and socially into harmony with the purpose of God for them, you may live without fear or worry. Do, seek your self-realization on the highest level. You will not give up mowing and reaping—you are not meant to be reavers. You will labor six days wisely and usefully, doing all your work. You will rest and aspire one day in seven. And when you thus live, intelligently and conscientiously bringing your lives personally and socially into harmony with the purpose of God for them, you may live without fear or worry. Do, seek your self-realization on the highest level. You will not give up mowing and reaping—you are not meant to be reavers. You will labor six days wisely and usefully, doing all your work. You will rest and aspire one day in seven. And when you thus live, intelligently and conscientiously bringing your lives personally and socially into harmony with the purpose of God for them, you may live without fear or worry. Do, seek your self-realization on the highest level. You will not give up mowing and reaping—you are not meant to be reavers. You will labor six days wisely and usefully, doing all your work. You will rest and aspire one day in seven. And when you thus live, intelligently and conscientiously bringing your lives personally and socially into harmony with the purpose of God for them, you may live without fear or worry. Between Ourselves

It is to be regretted that too many of us are prone to sit back and criticize the other fellow.

In our own community it is a case of let George do it, and if he succeeds, one faction exclaims him as an up and coming man, while the other faction sniffs audibly "anyone could have done that."

So it is in our Village affairs, the Council must do everything, and as long as things go smoothly, all is well, but fire works when things go wrong. Men occupying public places in our affairs are only human, and they like us all, err occasionally, but it is necessary for their shortcomings to be bandied about the streets, in back alleys and other places, and when the opportunity is given at the proper time and place, nothing is said.

In our own interests and that of the other fellow, when we have ideas and criticisms to make, let's do so to the men themselves at the various meetings, helping them all we can not hindering them.

It is of course anyone's given right to discuss matters getting ideas in exchange, but it is right to kick someone behind their back when we have not the courage to do it openly.

In our other columns we are bringing two points to the attention of our readers, and if there is any way that we can help we are willing to do our share.

Action Urgently Needed

The preservation and growth of unity, Canadian ideas, Canadian industry and Canadian institutions demand that the government of Canada take adequate action to give Canadian periodicals equal opportunities in their own country. Canadian Publishers ask no odds and do not advocate a tariff on foreign periodicals. They now publish the best periodicals in the world for Canadian readers—periodicals that will continue to be a vital force in Canada, offsetting foreign influences and fostering Canadianism in all spheres of national life.

By the removal of all duties, excise and sales taxes which increase the cost of Canadian periodicals, but which do not apply to foreign periodicals, and by restoring the pre-depression postal rate, the government of Canada can give Canadian periodicals a more even chance to offset the spread of foreign ideas in Canada.

IN THE RACE FOR BUSINESS
 The gentleman on the tortoise represents the man who does not advertise—the one who tries to do business as it was done in the days of the tallow candle or the oil lamp.
 Are you in the glare of the electric light—in the automobile of Modern Methods?
 Our Want Ads. are high voltage batteries, whether you want light or power—business publicity or competent help.

A small boy is a pain in the neck when he is around and a pain in the heart when he is not.

Ether Waves
 BY ORSMA
Battery Set Ground Important

The necessity for a good ground connection with a battery-operated receiver is often not thoroughly appreciated. In the ordinary A.C. radio, an effective ground is obtained through the electric power line, but in the case of a battery set no such grounding effect is present. It's necessary therefore to employ a good ground connection as well as a good aerial in order to obtain satisfactory performance. The efficiency of a battery receiver is reduced approximately 35 percent when the ground wire is omitted.

The ground may be a connection to a pump, to a water pipe, or to a long rod driven into moist earth. The surface to which the ground wire is to be fastened should be filed perfectly bright and the wire either soldered or securely clamped in place.

Remember it is highly important that a good ground connection be used, and if your radio does not seem to have the power that it once had, examine your ground; you may find the connection badly corroded or even completely disconnected.

SHORT WAVE

Many of our readers who during the past few months have been accustomed to listen to programs from American stations in the early afternoon, are finding it increasingly difficult to tune in these stations on the broadcast band. This condition is to be expected as this days grow longer. If, however, you have an all-wave set, you will find that quite a number of these programmes are also broadcast on short wave and may be received quite clearly. Major Bowes' Amateur Hour, for instance, is broadcast on short wave at 9.53 megacycles.

All short-wave stations tune very sharply, and the higher the frequency the more difficult it is to find these stations. Always tune slowly, and if you think there should be a station at a particular spot on the dial, go back and try again.

TROOPS WILL NOT LEAVE RHINELAND STATES HITLER

Karlsruhe, Germany.—Adolf Hitler, wildly cheered by an election meeting of 80,000 persons, proclaimed that "nothing will move us to renounce" Nazi sovereignty in the Rhineland but assured France, Czechoslovakia and Poland that armed German forces will not move against them.

In a campaign speech loaded with appeals for "common sense statesmanship" he criticized sharply what he called Soviet interference with the tranquility of other nations.

The reichsfuehrer reaffirmed his overtures for a new European peace pact, characterizing his offer as the "most magnanimous ever made anywhere."

His denunciation of Russia was based on a double criticism of Soviet policy, extending even to what he declared was an "international movement to prevent the nations from coming to the Olympics."

His plea for peace, historically founded on relationships between Poland and Germany, went back to his denunciation of the Locarno treaty and his offer to negotiate for new affirmations of peace in Europe. Hitler's words were broken time after time by loud salvos of applause from his listeners. He interrupted his own words once with a fit of racking coughs after he had become hoarse in a declamation of German progress against unemployment.

He said Germany had originally subscribed to the Locarno pact "for the sake of international understanding" even though the agreement "made it necessary for 14,700,000 Germans to remain unarmed."

Approximate population of the German Rhineland to which the fuehrer was referring, is 14,700,000.

France Looks To Allies

Sizes Up Strength Of Army At Her Disposal

Paris.—France, dropping official hints that she might prefer a "preventive war" with Nazi Germany now to "carriage" later, hastened to cement a chain of military alliances which would place a potential army of 40,000,000 men at her disposal.

A possible allied army of that magnitude was disclosed in new, if unofficial, figures to be based on an alliance of France, Soviet Russia, the Little Entente and Poland, and to embrace:

1.—For 48-hour mobilization: 8,000,000 men.

2.—Additional trained reserves: 31,000,000 men.

3.—Eight thousand aeroplanes.

4.—A million tons of warships.

The first category of the "paper army" troops which could be mobilized within 48 hours, was reckoned approximately thus: France, 1,000,000 men; Russia, 3,000,000; Poland, 1,000,000; Rumania, 3,000,000; Yugoslavia, 1,700,000; Czechoslovakia, 1,800,000.

As for aeroplanes, France was listed as able to furnish 2,400; Russia, 3,000; Yugoslavia, 600; Poland, 700; Czechoslovakia, 800; and Rumania, 600.

Ottawa Renews Loans

Accepts 1937 Treasury Bills From Saskatchewan As Security

Ottawa.—Renewal for one year of loans to the province of Saskatchewan amounting to \$1,024,218 is provided for in orders-in-council passed by the government and tabled in the House of Commons.

The loans matured in January and February and were secured by treasury bills of the province. The Dominion government has not only renewed the loans but has incorporated in the renewals the matured interest totalling \$47,390. Treasury bills maturing in 1937 have been accepted as security.

Shipping Cattle To Canada

Montreal.—Approximately 1,000 head of Canadian cattle would be shipped from Montreal to the British market every week during the coming shipping season. R. L. Large, of the firm of Stephenson and Large, of Birkhead and London, buyers of Canadian cattle, said, on return from a Dominion tour as far west as Saskatoon.

Western Barley Too Weedy

Must Be Cleaned To Become Popular As Food

Toronto.—Western feed barley will never achieve popularity in the east until such extraneous matter as weed seeds is removed in the cleaning process, the national barley committee was told by Prof. E. W. Crampton, professor of animal nutrition at Macdonald College, Quebec.

"As available commercially, the feed grades of western barley are penalized in feeding value and in popularity in eastern Canada because of the quantities of weed seeds and other extraneous matter of low or questionable nutritional value," he said.

"Until some marked improvement in feeding grades of barley by way of a reduction in the amounts of these adulterants is effected, it is questionable if this feed will be widely used in eastern Canada." With the available modern machinery for weed cleaning, it would not be difficult to remove the weed seeds, he asserted.

Lew Hutchinson of Duhamel, Alta., a practical farmer and member of the Alberta wheat pool, dealt with barley. What the producer most required, he maintained, was a barley that would yield early, have a good stiff straw and prove profitable to the farmer.

Referring to the problem of weeds in western barley, Mr. Hutchinson said the solution lay in better farming and in cleaning the grain on the farm. The farmer must be shown, he said, that he could make as much out of barley as he could out of wheat.

Program Should Be Uniform

Social Legislation For All Canada Urged In Nova Scotia House

Halifax.—In a surprise move that left the Nova Scotia legislature in a flurry of excitement at adjournment, Hon. Gordon S. Harrington, Conservative opposition leader, proposed a program of social legislation for the Dominion to be obtained through amendment of the British North America Act.

Col. Harrington, who recently resigned the chairmanship of Canada's employment and social insurance commission, declared that instead of tampering with a general procedure for amending the Dominion constitution, the province should agree to a specific amendment through Westminster if one is required to permit the Dominion government to engage in and at once set up the machinery necessary for such a full social program.

Suggesting maternity benefits, unemployment insurance, health insurance, accident insurance, widows' pensions, old age pensions and invalidity pensions, he said the Dominion government should adopt a complete program and have it uniform throughout Canada.

More Deaths Among Veterans

Government Approves \$60,000 Grant To Last Post Fund

Ottawa.—Deaths among war veterans are rapidly increasing in number. Hon. C. G. Power, minister of pensions and national health, told the House of Commons as it approved a grant of \$60,000 to the Last Post Fund.

The minister said the fund was established in 1921 to provide burial for indigent ex-service men and the number of men buried with the fund's resources had steadily increased since then. In the fiscal year 1921-22 the number was 33 and in 1934-35 the number had risen to 606. Indications were it was still far from reaching its peak as the veterans were getting older.

More Butter Produced

Output 11.5 Per Cent. Higher Than February 1935

Ottawa.—The output of creamy butter amounted to 7,894,567 pounds a gain of 815,715 pounds or 11.5 per cent over February, 1935, the Dominion bureau of statistics reported. Production in western provinces with previous year's figures in brackets: Manitoba, 966,081 (755,677); Saskatchewan, 606,792 (799,494); British Columbia, 512,367 (360,822).

Two Destroyers Launched

London.—The 9,000-ton cruiser Southampton has been launched at Clyde. The vessel is expected to attain a speed of 32 knots. At Walker, Northumberland, two destroyers of the 1934 program, the Hero and the Hereward, were launched. They are expected to have a maximum speed of 36½ knots.

Divided On Rhine Move

Report, Says Some Members Of Reich Are Opposed

Berlin.—Usually well-informed source indicated that certain members of the German government had opposed immediate remilitarization of the Rhineland.

Dr. Hjalmar Schacht, minister of economics, Baron von Neurath, foreign minister, and Gen. Werner von Blomberg, minister of war, were said to have been in this group.

According to the same source, Dr. Schacht favored negotiations with the other Locarno signatories in an effort to alter existing guarantees and supply others to take their place. Gen. von Blomberg was said to have contended the army was not strong enough to assume the responsibilities arising from reoccupation of the Rhineland.

BRITISH HOUSE HAS APPROVED DEFENCE PLANS

London.—The government's plans to build up Britain's defences were endorsed by the House of Commons at the conclusion of a debate over-shadowed by the situation in Europe arising out of Germany's latest defiance of the Versailles treaty and her abrogation of the Locarno pact.

A motion approving the white paper on defences tabled in the commons a short time ago was carried by a vote of 371 to 153 after a Labor amendment had been defeated, 378 to 155. The amendment condemned the government for its failure to include any provision for joint disarmament in the white paper, which called for extensive rearmament.

Neville Chamberlain, chancellor of the exchequer, said recent events confirmed the statements in the white paper that the situation would change periodically and that the defence plans would have to be revised accordingly.

"Collective security has not yet reached the point where national safety no longer needs consideration," he warned in concluding the debate for the government.

Winston Churchill, who has held numerous cabinet posts in former administrations, and other speakers warned of the situation created by Germany's rearmament. Churchill said Germany faced a choice between internal and external catastrophe and he feared she would choose the latter.

Sir Roger Keyes, admiral of the fleet, suggested Churchill's name as the minister who will be charged with the co-ordination of Britain's defence services. He said it was important to have for that post a statesman of wide experience, vision and determination.

(One of the provisions, included in the white paper on rearmament was the appointment of a minister whose task it would be to co-ordinate the work of the army, the navy and the air force. When the white paper was tabled, Prime Minister Baldwin said the minister would be named "soon.")

Herbert Morrison, former Labor cabinet minister, concluded the debate for the Labor opposition. He said his party was united in condemning practically the whole of the government's foreign policy.

"The government is using the phrase 'collective security' as a cloak for the old, unilateral, competitive armaments on a large scale," he asserted.

FAMOUS ADMIRAL DIES

Earl Beatty, famous British Great War naval hero, who died in London March 10 at the age of 65.

Work On Railways

Many Unemployed May Start Work By April First

Ottawa.—Prospects of an early spring break-up have led officials of the government to hope the first of 10,000 unemployed to be placed on railway maintenance work will be absorbed as early as April 1 in British Columbia, with a later starting date in the midwest and western provinces.

In accordance with the announcement of Labor Minister Rogers some time ago, those cared for in camps maintained for single, homeless unemployed, will be put to work on railway maintenance under an arrangement with the Canadian National and Canadian Pacific Railways.

It is understood the railways will each spend \$1,500,000 for this purpose and the federal government \$3,000,000, making a \$6,000,000 maintenance program which should occupy the normal relief camp population throughout the summer.

Another Sabotage Case

British Admiralty Believes Epidemic Is Work Of Cranks

London.—Lord Stanley, financial secretary of the admiralty, disclosed another case of suspected sabotage in the British navy to the House of Commons.

The latest case, he said, occurred in a private dockyard carrying out admiralty work.

Six cases of sabotage already had been announced. Lord Stanley said the damage was slight although potentially serious. Admiralty officials said they believed the epidemic of sabotage was the work of cranks rather than foreigners.

Visit From Lord Mayor

Vancouver.—The Lord Mayor of London has signified his intention of attending Vancouver's Golden Jubilee celebrations this year and Secretary of State Cordell Hull will probably represent the United States if President Roosevelt is unable to visit the city, Mayor G. G. McGeer said.

To Exempt Goods

Ottawa.—The government will, it is expected, bring down legislation providing for exemption of goods purchased by Canadian tourists in the United States up to \$100, at the time the budget is introduced.

PUERTO RICO SEEKS INDEPENDENCE

Pedro Campos

Agitation of the Nationalist Party to sever connections between Puerto Rico and the United States came to a head at the funeral of one of the assassins of Colonel Riggs, Chief of the Island Police, when Pedro Campos, above, Harvard student and leader of the party was arrested after urging independence for the island possession. Here we see Campos urging the crowd to seek freedom from bondage.

Was Fearless Leader

Royal Canadian Navy Officers Pay Tribute To Earl Beatty

Ottawa.—Officers of the Royal Canadian Navy voiced deep sorrow at the death of Admiral of the fleet, Earl Beatty. Many paid tribute to him as a commander who incorporated all the best traditions of the royal navy, an aggressive fighter and an efficient, fearless leader.

A large number of Canadian naval officers served with Beatty during the war, when he commanded the battle cruiser division of the grand fleet under the late Earl Jellicoe. Many of them were midshipmen at the time.

It was recalled that the battle of the Dogger Bank, fought Jan. 24, 1915, and which added great lustre to the name of the dead admiral, was opened by a ship which later became the senior unit of the Canadian navy, H.M.C.S. Aurora, long since dismantled.

Expect Rush Of Tourists

Ontario Health Inspector Looking Over Sanitation At Callander

Toronto.—In anticipation of the rush of tourists expected to come to see the Dionne quintuplets this summer, the department of health has sent an inspector to Callander to examine sanitation there, Hon. J. A. Paulkner announced.

The minister said that inspectors would also make other examinations in the north country where large numbers of visitors are expected.

ROYAL MESSAGE TAKEN TO MEAN KING MAY MARRY

London.—The possibility that Edward VIII, bachelor king of England, may marry was officially announced in the House of Commons in a message signed by the king.

The unmarried status of Edward, now 41, long has been one of the outstanding topics of conversation in the British empire and the world at large. As Prince of Wales, he was termed "the world's most eligible bachelor."

Neville Chamberlain, chancellor of the exchequer, read a royal message to the assembled legislators in which Edward pointed out the necessity of revising the civil list—the amounts paid to the members of the royal family.

The message stated:

"His Majesty desires that the contingency of his marriage should be taken into account so that, in that event, there should be a provision for her majesty the queen and the members of His Majesty's family, corresponding to the provisions which the commons has been willing to make in like circumstances in the past."

The Labor party member, William James Thorne, immediately rose with the question:

"Does His Majesty give any assurance that he is going to get married?"

But Chamberlain did not answer. King Edward also requested the House of Commons to make "suitable provisions" for the Duke of York, his presumptive to the throne, "and, in certain events, for his family."

He said however, he would bear part of these expenses from the Duchy of Cornwall, the rich estate which for hundreds of years has been administered for the benefit of the Prince of Wales.

The message said: "It is, however, His Majesty's intention, as long as the revenues from the Duchy of Cornwall are vested in himself, to make that provision for His Royal Highness, the Duke of York, and insofar as those revenues are sufficient, to provide for His Majesty's privy purse."

There has been considerable speculation as to the disposition of the Duchy of Cornwall, the revenues of which traditionally go to the Prince of Wales—a title which now is not held.

Mr. Chamberlain announced that a special committee would be named next week to revise the civil list. The king can marry without parliament's consent but in order for his wife to be his consort also, she must be a princess of royal or noble blood.

The king could marry a commoner if he chose, but if he did, the marriage would be morganatic and their children would not be entitled to the throne.

As a matter of courtesy, King Edward probably would ask parliament's approval before he married.

HOUSE DISCUSSES DUTY ON FRUIT AND VEGETABLES

Ottawa.—Arbitrary duty valuations will be used to protect Canadian fruit and vegetable growers from unfair competition from the United States, Finance Minister Dunning assured the House of Commons when Conservatives criticized vegetable tariff reductions in the Canadian-American trade treaty.

Vegetable tariffs were discussed most of the afternoon when the treaty was considered in committee stage. Conservative Leader Bennett chided the Liberals on their use of dumping duties and claimed the finance minister's announcement was a vindication of actions taken by his administration.

On many vegetables, the treaty reduced the Canadian tariff from 30 to 15 per cent. Conservative members, most of them from Ontario protested against the reduction, claiming fruit and vegetable growers would be forced out of business. Revenue Minister Ialey, whose department sets duty valuations, said the treaty gave the government ample power to protect Canadian producers.

Neither the finance nor the revenue minister "could announce when dumping duties would be applied or to what extent. They said the best judgment of the government would be exercised."

Two or three western Liberals protested against the height of the vegetable tariffs. They claimed it would increase prices on the prairies. Gordon Ross (Lib., Moose Jaw) urged regional tariffs with free importation for Manitoba, Saskatchewan and Alberta where fine vegetables are not grown in commercial quantities.

Sets Up Dictatorship

Paraguay Has Taken Germany And Italy As Models

Asuncion, Paraguay.—The provisional government of Paraguay, headed by Col. Rafael Franco, published a decree setting up the nation as a totalitarian state modelled after German national socialism and Italian fascism.

The decree declared the state and the "liberating revolution" of Feb. 17 as indivisible and banned for one year political parties or other unions which "do not emanate explicitly from the state."

Paraguay, the government asserted, will be purged of "endemic, demagogic, industrial and sectarian evils."

The official statement places in the "liberating army" the principal source of authority and declares the successful revolution implies the "same social totalitarian" institutions as in contemporary Europe in the sense the liberating revolution and the state are already one and identical.

To Investigate Prices

Ottawa Will Check Up Increase On Farm Implements

Ottawa.—Arrangements were made by the agricultural committee of the House of Commons to investigate the increase in prices of farm implements put into effect this year by the Canadian manufacturers. The committee also went on record as being "of the opinion" the increases should not be put into effect until the committee had completed its probe.

When the Canadian-United States trade agreement came into effect reducing the duties on farm implements from United States from 25 to 12½ per cent, Canadian implement manufacturers increased their prices in their 1936 price lists. The action was debated in the Commons and the question referred to the committee.

References To Tariff Board

Ottawa.—The minister of finance has made 93 references to the tariff board for inquiry since its inception, a return tabled in the House of Commons stated. Of this number 86 were made on applications from companies or persons in Canada, and 13 on applications from the government of the United Kingdom.

A New Record

Moscow.—An endurance record was claimed by a red air force mechanic, I. Golushko, who kept his face in a gas mask for 116 hours, 45 minutes, except for three 15-minute periods when the mask was removed to permit him to eat.

Electrical Engineers Have Least
Difficulty In Securing Jobs

Prospects are good for all 170 members of the graduating class in the Faculty of Applied Sciences at the University of Toronto will find positions this spring, Brig.-Gen. C. H. Mitchell, dean of the faculty, said. Employment was found for last year's class of 160 with little difficulty. Electrical engineers are most in demand, followed by mechanical, mining and metallurgical engineers, with chemical engineers last.

Thick eyebrows may be made thin, but it takes a lot of luck.

Real relief... quickly!

MINARD'S
"KING OF PAIN"
LINIMENT

FLEMING'S
FOLLY

BY
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Boak Torney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to revoke his earlier endorsement, and declare that irrigation in Boone county so far as Fleming's plan was concerned was only a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence her, and she asserts, "I'll spread," Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Helen and Link ride to Rawhide for supplies and to obtain funds to carry out the dam project. They meet Roper, who greets Helen and offers to shop with her. Link goes to see the Sheriff, who tells him Buzz Hamilton has been paroled, and would arrive on the incoming stage, but that he thinks Link has made a mistake in getting Buzz released.

(Now Go On With The Story)

CHAPTER IX—Continued

"No, you bet not. Me and Marty Bush swore off a couple of years ago."

Slowly she wheeled her pinto. "I thought perhaps you meant to try to win money to help us out. Because we are still in danger of being unable to finish the dam, aren't we?"

Link avoided her look as he shrugged his shoulders. "Some. But playin' to win means you're sure to lose. No, Helen, I'm stayin' to fix a treat that'll sure tickle you. Nope, can't tell you now. Wait an hour or two."

He stood in the thick dust watching her ride away. Then that look of fondness, the source of which was considerably deeper than casual friendship, he started for the spot where Sheriff Stephen stood waiting. "Buzz came on the stage while you were in the bank," the official notified. "I tried to stall but Jackpot Mell an' Kilgo came along an' made a fuss over Buzz an' insisted he have a drink with 'em. The hull gang is in the Half Moon now."

Purrows grooved Fleming's dark forehead as he surveyed the two-story false front of the saloon. "Doggone it," he exclaimed irritably, "those hembres don't care what they do to a youngster. Of course, Buzz is only two years younger'n me, he's twenty-one, but he seems like a kid. Sheriff, that's got to be watched all the time. This'll be a fine start for a chap just paroled from prison."

"Helen's don't know he's here?" Link shook his head. "I sent her on home. Now," he said reluctantly, starting away, "I've got to separate Buzz from them vultures and get him out to the Triple H. Amex, it might be better if you didn't come, on account of Buzz prob'ly saw all the lawmen at prison he cares to see for quite a spell."

"I'll let 'em alone so long's he don't go have another shootin' match," Tell Buzz I said so."

And the link officer moved off.

Through a friend at the state capitol Link had managed to have Buzz paroled after serving six months of the three year sentence. Fleming had gone to this trouble merely to please Helen, for with a sister's fondness for an errant brother, she was unusually attached to Buzz. So much so, in fact, that she never thought of him as a criminal and a weakling, but as a youth who had been unfortunate in his choice of companions. It was Helen's ambition, Link knew, to see Buzz make a man of himself so that he could one day yield him the Triple H to manage again, or share their spread and surrender his share.

Moodily reviewing these facts, he strode inside the Half Moon. As the swinging doors flapped behind him several loafers glanced up with interest. Recognizing him, they exchanged significant looks and their eyes strayed to a large wall table

where five men sat playing cards. With something of a shock he identified the ex-convict for whose actions he was now responsible. Grey prison pallor had dissipated his former healthy tan and Buzz Hamilton's thin face was lined beyond his years. A furtive, hangdog expression persisted on his features and he had lost weight until he was almost scrawny. Loose, ill-fitting prison clothes hung in wrinkles about his sparsely fleshed body. The newcomer's whole appearance was little less than shocking.

Fleming's eyes caught those of the ex-convict and he forced a welcoming smile as he strode the few paces to the table. "Howdy, Buzz! Glad you're back. Say, you're looking good," he lied glibly. "Helen'll shore be glad—reckon there's nothin' she's wanted more than to have your help on that old Triple H spread."

The other's gaze fell. "I s'pose you're glad to see me. Got things fixed to suit yourself, Fleming, so why shouldn't you be?"

Utterly taken back by this reply, Link frowned. "What do you mean, Buzz? 'Course I'm glad to see you! Best part is," he chuckled, striving to win enthusiasm from those lackluster eyes, "Helen doesn't know a thing about it. She'll be tickled when you ride up! Shall we start now?" he suggested.

(To Be Continued)

Canada And Defence

Dominion Has Made No Commitments, House Of Commons

Canada has made no commitments whatever with regard to empire defence or any other military activities, Prime Minister Mackenzie King told the House of Commons in answer to a question from J. S. Woodsworth (C.C.F., Winnipeg Centre).

Mr. King said he received from Hon. Vincent Massey, high commissioner in London, the text of the statement made in the British House of Commons by Rt. Hon. J. H. Thomas, secretary for the colonies. Mr. Thomas dealt with the conference of Dominion premiers in London last May and the position of the Dominions in the league.

Defence matters had been discussed when the premiers were in London for King George's jubilee. With respect to that, former Prime Minister Bennett had said no undertakings had been asked or given. Mr. King said he could not say the same thing about communications passed between the governments of Canada and the United Kingdom since the Liberals came into office.

It should be understood, said Mr. King, that Canada, as a member of the league took responsibility only for those steps which had been taken by Canada on its own behalf.

Mothers Aided by
Guide to Better
Control of Colds

Practical Plan Is Helping
Families Everywhere to
Have Fewer, Milder
and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefiting by following Vicks Vapo-Rub for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Help Build Resistance to Colds—Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds—At the first warning of nasal irritation, sniffle or sneeze, use Vicks Vapo-Rub—just a few drops up each nostril. Vapo-Rub is especially designed for the nose and upper throat—where most colds start. Used time, Vapo-Rub helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner—If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks Vapo-Rub. Vapo-Rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster. (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Vapo-Rub and Vicks Vapo-Rub.

Mr. CAFFEINE-NERVES...
he gets expelled from school

Little Helps For This Week

Whoever a man soweth that shall he also reap, Galatians 6:7.

Sow love and taste its fruitage pure,
Sow peace and reap its harvest bright;
Sow sunbeams on the rock and moor,
And reap a harvest home of light.

The life above is the ripe fruit of the life below. The inclinations of the soul which shall issue hereafter in perfection must be trained in us throughout the whole course of this earthly life. The future perfection of the saints is not a translation from one state or disposition of the soul into another, but the carrying out as it were the blossom and fruitage of the one and same principle of spiritual life which through their career on earth has been growing into a promise of perfection, reaching upward after perfect holiness.

Trans-Atlantic Air Service

Semi-Weekly Flights Between Britain And America To Start This Summer

Eugene L. Vidal, United States director of air commerce, told an American Legion meeting semi-weekly trans-Atlantic flights between Great Britain and North America will start this summer on regular schedule.

Imperial Airways and Pan-American Airways each will send two planes a week across the Atlantic, Vidal said. Passenger service, however, will not be inaugurated for "some time."

The planes will use the Newfoundland and Ireland route in summer and the Azores and Bermuda route in winter.

France plans eventually to make the Atlantic flight in a single jump, Vidal said, while German aeroplanes will use catapult ships in the vicinity of the Azores.

Thousands Of Mail Contracts

Postmaster-General Elliott told the House of Commons 12,002 contracts for transportation of mail are in operation in Canada at present. The number in provinces included: Saskatchewan, 1,433; Alberta, 1,104; British Columbia, 802; Yukon, 14.

The Croydon, Surrey, Eng., library collects an average of \$500 monthly in fines imposed for keeping books over time.

Home Of The Future

University Professor Sees It As Vacuum Bottle Type

A house built on the vacuum bottle principle may be the forerunner, a Northeastern University professor said, of the air conditioned home of the future.

Its walls are 14 inches thick, its windows never open and its heating system functions without registers or radiators.

Frederick Stearns, assistant professor of mechanical engineering at Boston University, has had it under observation for a year. During that time, he said, because of the automatic air conditioning system built into the dwelling, inside temperature and humidity have remained practically constant regardless of outside conditions.

In the heyday of the Volga river in Russia, 25,000 barges piled the river.

Gold was found in a meteorite which fell in New Mexico several years ago.

Pensions Court Hears Appeals

Many Cases Awaited Consideration At End Of 1935

A total of 789 appeals awaited consideration by the pensions appeal court at the end of 1935, according to information tabled in the House of Commons by Hon. C. C. Power, minister of pensions and national health. Of this number, 27 were appeals of the crown from the pensions commission, 651 were appeals of applicants from the same body, and 111 were in "other categories." The return showed 36 appeals were allowed by the court in 1935, while 1,603 were disallowed.

Chief Slept Through Fire

"Deep in the Sleep" might well be the title of this little story. John Andersen celebrated his election as chief of the volunteer fire brigade at Anchorage, Alaska, by sleeping through the first fire. The station siren aroused the whole town but not the chief, just a block away. His wife, a night telephone operator on duty, couldn't rouse him either.

TEA
anytime

Skilfully blended from the finest Indian and Ceylon estates... Nabob's outstanding flavor has made it a favorite at teatime everywhere. When you want a really good Tea, be sure to order NABOB.

Gossip and Grumbles
Walter Spivey advocating that a sign be printed and placed on the Main Highway near the Service Station: "Go Slow, Mr. Driver, Go Slow, Crossfield has no Hospital. Allan Montgomery refusing to be known as Mr. Manning. Everitt Bills being the first person to reserve seats for the Toronto Maple Leafs and Chicago Black Hawks game at Calgary next month. C. H. McMillan sees some more N.H.L. hockey stars in the present junior playoff teams. Gudiman Johnson can't stay away from a good town, and in spite of the fact that his larynx is enlarged can still warble his masterpieces, Red River Valley. Harry May looking for some new directors. Tom Treadway showing a few of the idle rich how windows should be washed. Bert Bannister wondering if he could create a "meter" and attract business to town. Evan Gordon wishing he was a Commissioner for Oaths. It is rumoured that a Corset party will soon be held in town. In Radio language "Some Hookup." James Dickson training his heavyweight boxing champions, and showing them the proper way to skip. Nyal Tweedle says he ball moustache by July. Happy McMillan says, "One man's meat is another man's croquette. Johnny Douglas says the Scots have found a new use for old razor blades. They shave with them. A north-end lady wearing an orange Tammie on St. Patrick's Day. Corporal Don Cameron says his forced sojourn in the hospital is improving his girlish figure and complexion. Florence Cruickshank says dances are OK, but "oh the next morning."

Activities of Societies Etc.
B.E.S.L.
The monthly card party and entertainment drew a fair crowd to the Masonic Hall on Wednesday last.
Mrs. D. W. Carmichael and Mrs. E. S. Halliday were the prize winners in the Ladies Division. Messrs. Carl Becker and D. W. Carmichael excelled in the Genua class.

Ladies Aid
The public are reminded of the tea and sale of homecooking on Saturday, March 21st, in the Militia Building, Main Street, under the auspices of the Ladies Aid of the United Church.

Floral U.F.W.A.
The annual St. Patrick's dance was held last Tuesday evening in the East Community Hall. A record crowd was in attendance. Trainer - Robinson orchestra, of Calgary, furnished the music, and those who attended voted it one of the best dances yet.
Mr. and Mrs. H. J. Schofield won the prizes for the best costumes (Irish), and Miss O. Bills the prize for the best Calico costume.

School Fair
Keep this date in mind, the School Fair will hold its annual concert in the U.F.A. Hall on Wednesday, April 8th. Further details later.

Native Sons and Daughters
There will be a meeting, in Gordon's Office, on Saturday, March 21st, at 8 p.m., sharp, of the Native Sons and Daughters to decide the momentous question of a round-up. A good turnout is imperative as this meeting must decide.

NOTICE TO CREDITORS AND CLAIMANTS
In the Estate of Daniel K. Fike, Deceased, in His Lifetime of Crossfield, in the Province of Alberta, Farmer.
Notice is hereby given that all persons having claims on the estate of the said Daniel K. Fike who died at Crossfield, Alberta, on the 9th day of August, A.D. 1935, are required to file with Robert Ure, of Crossfield, aforesaid solicitor for the executor, Joseph D. Fike, by Saturday, 11th day of April, 1936. A full statement duly verified of their claims and of any securities held by them and that after that date the executor will distribute the assets, if any, among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.
Dated this 27th day of February A.D. 1936.
ROBERT URE, of Crossfield, Alberta, Solicitor for the Executor.

Local and General.
Joe Gilechrist, of Barons, was in town Friday.
Mr. and Mrs. L. Wight, of Carstairs spent Friday in town.
Jno. Chalmers was a Calgary visitor Tuesday.
Marion Ingham, of Madden, was a Friday visitor to Crossfield en route for Calgary.
Staves are stocking up this week on Easter Novelties, see them before going elsewhere.
Messrs. Orr, Duthie and Short, of the Inspection Department of C. B. of C., Calgary are giving the local Bank the yearly audit.

Have you seen the Drug Store window this week, cram full of nice things for Easter, call and see Alf's stock, it will pay you.

George McLeod PUDGM, of the I.O.O.F. attended the Odd-fellows Grand Lodge Assembly on Wednesday last week.
How is your subscription to the Chronicle? If in arrears may we have payment at an early date. Thank you.
Halliday and Laut has a bigger and better assortment of Easter Novelties than ever before. They are well worth a special visit.

Spare copies of the Chronicle are now for sale on the newsstands of the Edlund Drug store and Bannister Electric.
Mrs. C. Casey, Miss M. Anderson and T. L. Christmas were business visitors to Calgary on Monday.

From the pages of this paper you can make up a shopping list that will save you money. Read the Ads, and support local merchants.

The boys and girls of the district should read very carefully the announcement of the M.D. of Rosebud shown in another column.
Don't forget the Community Sale to be held on Monday, March 23, the biggest and best yet. See separate announcement.

Mrs. Wm. Urquhart, who is at present a patient in the Holy Cross Hospital, is improving slowly.

The Pringle Electric Hatchery of Calgary is again giving a prize at the School Fair, provided the winning exhibits are raised from Pringle stock.

Mrs. Mae Fox was elected Grand Warden at the Grand Assembly of the Daughters of the Rebekkah's for the Province of Alberta at the convention held in Calgary last week.

Subscribers of the Crossfield Mutual Telephone Co. should note that the annual meeting has been set for Saturday, March 28. See other columns for financial statement.

Quite a few of the local populace visited the great white way of Calgary Saturday, amongst those noticed were: Dr. and Mrs. S. H. McClelland, Miss E. Seville, Miss M. Murdoch, Miss Lillian Johnson, Mrs. G. Y. McLean.

The first gopher seen in the vicinity of the village was observed last week in the local school grounds. Frisking about in a lively manner, the little fellow evidently thought spring was here. He changed his mind somewhat when the storm of human personages in the shape of Grades 2, 3 and 4 took after him.

M.D. OF ROSEBUD
NO. 280
The Council have agreed to pay through the School Districts to the pupils resident within this municipal district 1 cent for each gopher tail handed to the teacher on or before 30th April next. Remember one gopher killed before the breeding season does more to keep this pest down than many more later in the season.
A. S. GOUGH, Reeve.
